Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites the limitation "said connection means" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 32 recites the limitation "said structural members" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Claim 33 recites the limitation "said corresponding structural members" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Claim 36 recites the limitation "the contactless measurement and/or detection means" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.

Claim 37 recites the limitation "the measurement and/or detection means for detection and/or measurement of relative displacement in at least two dimensions " in lines 1-3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3731

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-10, 19-26, 28, 31-35, and 37 rejected under 35 U.S.C. 102(b) as being anticipated by Boland (U.S. Pat. No. 4,576,158). Figs. 1-2 and the disclosure in col. 3, line 54 to col. 4, line 7 show an apparatus for and a method of measuring strength of a bone after a fracture and as the bone heals, the reference having all the limitations as recited in the above listed claims, including: at least two external fastening means (clamp assemblies 4 and 5); and means (bar 1 with a plurality of strain gauges) for detection and/or measurement of relative displacement in at least two dimensions (torsion and two perpendicular components of bending). As to claim 35, "optical measurement and/or detection means" is met in Boland in that a surgeon can also detect relative displacement between the clamp assemblies during the application of force to the bone by visual observation.

Allowable Subject Matter

Claims 1-5 and 11-18 are allowed.

Claims 27, 29, 30, and 36 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
